

## About LANSA

LANSA is a software company that helps customers enhance their business performance through the use of leading-edge technologies, services and solutions.

A privately held company, LANSA was founded in 1987 with an original goal of producing solutions that take the pain out of software development and maintenance. Today, with over 225 employees worldwide, LANSA supports 6500 customers in more than 67 countries and over 300 Business Partners worldwide.

The LANSA team supports our customers and partners across three main regional geographies: The Americas, Europe/Middle East/Africa (EMEA) and Asia Pacific. The LANSA Product Center - based in Sydney, Australia - houses the research and development team.

## LANSA Products

LANSA is a development environment and suite of e-business solutions that organizations use to rapidly implement business systems that make effective use of new technologies. From its beginnings as a 4th generation language and repository-based development environment, LANSA has evolved to a powerful family of products and solutions that support IBM iSeries (AS/400), Windows, UNIX and Linux platforms.

LANSA's software products consist of four main business solution offerings:

- Application Development
- e-Business Solutions
- Technology Integration
- Data Access

Whether you're building applications from the ground up or extending your current systems to trading partners and customers, LANSA's products and solutions incorporate the latest technologies including XML, Wireless and Java - and can integrate with the world's leading enterprise solutions.
